INSTRUCTION

#### **Dr. Crane's Open Letter to Parents**

I felt the need of a school for my nine year-old grand son where he could get individual attention during his formative years in company with a small group of boys under sympathetic and efficient teachers.

At my Ruggestion the McBurney School for Boys of the West Side Y. M. C. A. has added a Junior School of Intensive Training to open next week. Dr. A. A. Berle, author of "The School in the Home" and "Traching in the Home," with his two daughters, will have charge. The school is limited to 30 boys. Only boys who can be especially helped by the school will be accepted.

The plan of this school appeals to me and I think that parents should know about it. They should communicate with Newell W Edson, Headmaster-McBurney School, 318 West 57th Street, Columbus 7990.

-DR. FRANK CRANE.

# Keeping Faith

THE cars are coming! From now on travelers will notice a gradual transformation in the long trains which recently have been breaking all tonnage records. They will see an ever-increasing number of bright spots-here and there snow-white refrigerators, glossy-black hopper and gondola coal cars, and glistening-red allsteel box cars.

Already the first section of the new equipment ordered by the New York Central Lines immediately following the termination of Federal control has been received from the shops and has gone into the Nation's transportation service. The balance will be delivered continuously and in increasing volume.

These cars come with the advent of the busiest of fall and winter scasons. at a time when they are needed as never before.

WHEN the Government turned the railroads back to their owners, experts computed that approximately \$500,000,000 worth of new equipment was the imperative need of the hour. The New York Central Lines immediately placed their \$53,000,000 equipment order, covering 196 locomotives, 265 passenger cars and 11,244 freight cars.

These freight cars, if coupled together, would make a solid train ninety miles long. But measured by the total number of efficient cars added to active service, the repair program of the New York Central Lines this year amounts to several times the new construction.

Crippled freight cars to the number of 59,196 were rebuilt and rendered 100 percent, serviceable up to September 1st. During the same period, "medium" repairs were made to 41,222 additional damaged freight cars.

**TAST** March assurances were given the shippers and the public generally that no time would be lost in meeting the needs of the service, in rehabilitating existing equipment and purchasing new rolling stock.

The New York Central Lines are keeping faith.
